

Cots

Dewdrop cot with clear view ends G255 and storage drawers G18

Telescoping dowels

Our unique design allows you to lower the side and still have unhindered access to the storage bins.

One-hand, childproof latch

(Dewdrop cot only)
Release our patented latch with one hand, activating the drop-side so you can ease a baby into the cot.

Cot storage drawers

Because the cot side telescopes instead of lowering, these optional storage drawers are always accessible.

Evacuation cot

With a weight limit of 60 kg, our evacuation cots can carry several babies to safety. Sturdy 10 cm castors navigate rough terrain, and can lock in place when you've reached your destination.

Clear view ends

Distance from the top of the mattress to the top of the cot railing:

Adjustable mattress height – 3 positions

The same cot can safely accommodate newborns or older babies. Child-proof height adjustment, no tools needed.

High 23 cm

Medium 38 cm

Low 56 cm

Note: Evacuation cot mattress height is not adjustable.
